**(vii)** Para 8.3 of AS 4 “Contingencies and Events Occuring after the Balance Sheet Date”, states that adjustments to assets and liabilities are not appropriate for events occurring after the balance sheet date, if such events do not relate to conditions existing at the balance sheet date. The destruction of warehouse due to earthquake did not exist on the balance sheet date i.e. 31.3.2009. Therefore, loss occurred due to earthquake is not to be recognised in the financial year 2008-2009.

However, according to para 8.6 of the standard, unusual changes affecting the existence or substratum of the enterprise after the balance sheet date may indicate a need to consider the use of fundamental accounting assumption of going concern in the preparation of the financial statements. As per the information given in the question, the earthquake has caused major destruction; therefore fundamental accounting assumption of going concern is called upon. Hence, the fact of earthquake together with an estimated loss of Rs. 30 lakhs should be disclosed in the Report of the Directors for the financial year 2008-2009.

**PAPER – 1 : ADVANCED ACCOUNTING**

- (b) The disadvantages of Enterprise Resource Planning (E.R.P.) are as follows:
- (i) **Lesser flexibility:** The user may have to modify their business procedure at times to be able to effectively use the E.R.P.
  - (ii) **Implementation hurdles:** Many of the consultants doing the implementation of the E.R.P. may not be able to fully appreciate the business procedure, to be able to do a good implementation.
  - (iii) **Expensive:** E.R.Ps are normally priced at an amount which is often beyond the reach of small and medium size organisations.
  - (iv) **Complexity of the software:** Generally an E.R.P. package has large number of options to choose from. Further the parameter settings and configuration makes it a little complex for the common users.

(c) **Calculation of number of days from the base date**

<i>Due date</i>	<i>Amount (Rs.)</i>	<i>No. of days from 5.3.09</i>	<i>Product</i>
5.3.2009	5,000	0	0
7.4.2009	7,000	33	2,31,000
17.7.2009	6,000	134	8,04,000
14.9.2009	<u>8,000</u>	193	<u>15,44,000</u>
	<u>26,000</u>		<u>25,79,000</u>

$$\begin{aligned} \text{Average due date} &= \text{Base date} + \frac{\text{Sum of Product}}{\text{Sum of Amount}} \\ &= 5.3.2009 + \frac{25,79,000}{26,000} = 99 \text{ days} \end{aligned}$$

The date of the cheque will be 99 days from the base date i.e.12.6.2009. So on 12<sup>th</sup> June, 2009, all bills will be settled by a single cheque payment.
